We have shown that amongst the Biblical Proofs of Israelite Ancestor are to be

included:

Military Might

and being a

Dominant World Power

We especially emphasized the application of these Prophecies to Joseph but the blessings also applied to other Tribes.

The top ten most powerful countries in the world based on the 2012 National Power Index are the USA, China, Russia, France, Japan, United Kingdom, Germany, India, Canada and Israel.

<http://www.mapsofworld.com/world-top-ten/world-top-ten-powerful-countries-map.html>

The list includes the State of Israel at no.10. Even though Israel is at the end of the list its national Power Index shows the difference between Israel and most of those above it is not that great.

Countries (National Power Index in parentheses):

1. United States (77.771)
2. China (58.662)
3. Russia (43.363)
4. France (43.244)
5. Japan (42.95)
6. UK (41.426)
7. Germany (39.777)
8. India (35.48)
9. Canada (32.869)
10. Israel (32.1910)

In the above list three countries (USA, UK, Canada), may be associated with Joseph; one (France) with Reuben; and one (Israel) with Judah. That gives us 5 out of 10 with the USA well at the top.

China, Russia, and Japan (in part) are nations of Magog.

Japan and Germany are nations of Edom.

India is Cush.

Here are the populations of the countries in question

Population (2012)

USA 317,612,000

China 1,360,720,000

Russia 143,657,000

France 65,820,000

Japan 127,220,000

UK 63,705,000

Germany 80,000,000

India 1,239,920,000

Canada 35,295,000

Israel 8,134,000

Let us now divide the National Power Index by the Population (in rough figures).
This gives us:

Power per Head of Population

(very rough figures) with National Power Index relative ranking in brackets:

1. Israel $40e-7$ (10)
2. UK $15.6097e-7$ (6)
3. Canada $9.42857143e-7$ (9)
4. France $6.51515152e-7$ (4)
5. Germany $5.e-7$ (7)
6. Japan $3.38582677e-7$ (5)
7. Russia $3.00699301e-7$ (3)
8. USA $2.46056782e-7$ (1)
9. China $0.433504776e-7$ (2)
19. India $0.00002.75e-7$ (8)

Selected remarks from article:

Top Ten Most Powerful Countries in the World

<http://www.mapsofworld.com/world-top-ten/world-top-ten-powerful-countries-map.html>

United States : The United States heads the UN's list of countries by GDP, and is the third most populous country in the world. It also heads the power index on four parameters, namely economic, military, technological and foreign affairs capabilities. The US looks set to stay on the top of the list for at least another decade or more.

Russia : The largest country in the world in size, Russia ranks second in the world in military capability. Its vast energy resources also place it high in the energy security category, and it continues to exercise international influence, thus leading to its high ranking in the foreign affairs capability category.

Israel : Though a small nation in terms of area and population, Israel ranks highly on technological and scientific progress. Israel also wields significant influence in the Middle East region due to its military capacity. Israel also ranks a high fifteen on the UN Development index, reflecting the high quality of life this small but prosperous state has been able to provide to its people.

We showed the above figures to a friend who has some interest in these matters and he quite vehemently protested saying that the Wikipedia NPI rankings, shown below, are far more reliable, i.e.
